Construct Week Project
Certificate B38 🔗
Masai School

PROFESSIONAL SUMMARY

Adaptable Frontend Developer proficient in React.js, JavaScript, and responsive web design. Combines excellent problem-solving with collaborative teamwork to create scalable, high-quality UI solutions. Capable of employing Generative AI and quickly learning new technologies to enhance project outcomes and development processes.

PROJECTS

1. Digital Era | 🌐 | ⓖ
CSS3 | HTML5 | JavaScript | Git |
Responsive Web Design

- Showcased the evolution of UI/UX designs and webpages.
- Developed 2000 and 2010 webpages using HTML, CSS, and JavaScript.
- Designed responsive layouts for multiple devices, ensuring cross-browser compatibility.
- Implemented UX design with intuitive navigation and added dynamic interactivity with JavaScript.
- Included demos of modern design tools like Figma or Adobe XD, reflecting current trends and design principles.

2. StyleVista | 🌐 | ⓖ
HTML5 | Tailwind CSS | JavaScript | Git | CSS3 |
Responsive Web Design

- Developed a fully responsive navbar using Tailwind CSS, ensuring seamless adaptability across devices.
- Created a custom, cross-browser compatible footer to enhance user experience.
- Designed a visually appealing banner section to captivate users' attention.
- Utilized JavaScript to ensure smooth navigation and maintain mobile responsiveness.
- Leveraged Tailwind CSS for efficient styling, contributing to a modern and scalable user interface.
